The dice-rolling experiment aims to determine the number of times I get a six (6) or otherwise, if the dice were rolled 20 times and the dice were altered by being slightly burned.

Roll	1	2	3	4	5	6
Outcome	5	2	2	6	1	1

Roll	7	8	9	10	11	12
Outcome	3	5	2	1	5	3

Roll	13	14	15	16	17	18
Outcome	2	1	1	6	4	2

Roll	19	20
Outcome	6	3

Results

Positive outcome:3

Negative outcome:17
